

# Bonadeo Boatworks 368 WA

The father-and-son team of Larry and Tony Bonadeo are among the finest custom yacht builders in all the

land, and the 368 Walk Around is another shimmering example of their creativity and superlative skills.

Larry and his team build every Bonadeo one at a time, by hand. Starting with a prospective buyer's concept, Larry and a naval architect refine the design to meet the dream. Bonadeo's interior appointments have no rival in this class, but it's the hull that makes a Bonadeo legendary. Larry's signature construction process involves resin infusion and vacuum bagging, utilizing vinyl ester and/or epoxy resin, Kevlar, carbon fiber, quadaxial fiberglass and composite cores. It's complicated, but it produces the most amazing hull on the sea, splitting waves like a sportfisher, while remaining unshaken and silent.

But make no mistake, just because the ladies will swoon over its many gorgeous amenities, like a full queen

birth and exotic hardwoods, it remains a very serious fishing vessel, with a huge, pressurized livewell, an in-deck fish box, two custom tackle stations, a massive command console, RUPP outriggers and much more.

If you're tentative to take the step to a big sportfisher, you need to take a Bonadeo out for a sea trial. Visit them at the MIBS or WPS, or at [www.bonadeoatworks.com](http://www.bonadeoatworks.com). 

## 368 WA Specs:

Length Overall: .....36' 8"  
 Beam: .....10'  
 Draft: .....23"  
 Weight (loaded): .....12,900 lbs.  
 Fuel: .....324 gals.  
 Max HP: .....900
