

# NEW BOAT □ BONADEO 31

*The Bonadeo 31 is a testament to what can be accomplished when high-tech materials are combined with meticulous hand-built construction and one-off design.*

**W**hen Larry Bonadeo decided he wanted a sportfisherman, he had one custom built and was fortunate enough to join the construction crew as a laborer helping to produce his 63' boat. So when he decided to add a smaller boat to his fleet, he figured there was no reason why it

shouldn't be just as custom as his sportfish. Relying on more than 20 years of experience in construction combined with a lifelong passion for boating and fishing, he began working on this new project and entered the boatbuilding arena. Betting that he was not the only big boat owner that

desired a one-of-a-kind smaller build, Bonadeo Boatworks was born.

On tour this boat show season as an example of the fine work this family owned and operated business is capable of is the Bonadeo 31, the firm's second build. The Bonadeo 31 showcases what can be accomplished

*Clockwise from top: the forward bilge features top-of-line cabinetry; the sharp Carolina-type entry slices through the water; the seating arrangement is left up to the owner; and the custom helm boasts a teak pod and single-lever controls.*

when a boat is constructed from a one-off design for a particular owner. The Bonadeo boats are hand built one at a time and are constructed with a cold-molded vacuum-bagged process utilizing epoxy resins, carbon fiber, Kevlar, and composite cores. The result is one-piece construction that is

extremely light and strong.

The 31's waveform bell hull design is combined with a sharp Carolina-type entry forward for exceptional performance. Bonadeo says this marriage produces a very soft and stable riding boat capable of comfortable cruising all day.

Everything about the Bonadeo 31 screams custom. From the hydraulic helm to the single-lever controls to the teak pod, this is a high-end build for a discerning clientele. Therefore, it incorporates many features normally reserved for larger boats, such as its separate pump room and seven struc-

tural bulkheads, and Bonadeo pays great attention to every detail, including heat shrinking all hose clamps so they can't cut anyone.

Other notable features showcased on the 31 include teak decking, a 25-cubic-foot chilled fish box in the aft deck, a transom livewell, and a central drainage system that routes all drainage overboard bypassing the bilge system. A full head is located in the center console, and it is finished just as meticulously as the rest of the boat with matched mapa burl cabinets

and teak and holly soles. Seating is located in the bow and forward of the center console, but, like everything else aboard, it is completely customizable and left to the desires of the owner.

Each build at Bonadeo begins with an owner, and that individual's conceptual ideas form the basis for the boat. This means that the sky is the limit in terms of what an owner can have with Bonadeo, who will build anywhere from 30' up to 50' while always delivering a soft ride, high-tech construction, and a one-off design. 

## SPECIFICATIONS

LOA	31'
BEAM	9' 10"
DRAFT	1' 10"
GROSS WEIGHT	7,200 LBS.
FUEL	300 U.S. GALS.
WATER	50 U.S. GALS.
POWER	2 X YAMAHA @ 250 HP
CRUISING SPEED	40 MPH
TOP SPEED	48 MPH
RANGE	N/A
